Summary

MCA candidate (Techno College Hooghly, 2025–2027, CGPA 9.16) and B.Sc (Honours) Computer Science graduate (University of Kalyani, 2025) with strong fundamentals in programming, scripting, and database concepts. Full-stack project experience building AI-integrated web applications, with hands-on exposure to cybersecurity through certified coursework and a job simulation. Seeking an entry-level Software Engineer / Developer role to apply problem-solving and coding skills in a product-driven environment.

Education

Techno College Hooghly <i>Master of Computer Applications (MCA) — CGPA: 9.16</i>	West Bengal, India 2025 – 2027
University of Kalyani <i>B.Sc (Honours) in Computer Science — 82.43%</i>	West Bengal, India 2025
W.B.C.H.S.E (Higher Secondary) <i>Higher Secondary — 78.20%</i>	West Bengal, India 2020
W.B.B.S.E (Madhyamik) <i>Secondary — 63.70%</i>	West Bengal, India 2018

Technical Skills

Programming Languages: C, C++, Java, Python
Web Technologies: HTML, CSS, JavaScript, PHP
Databases & Auth: SQL, Email OTP Authentication
AI/Chatbot: RASA (Conversational AI), Applied AI with Python
Tools & Technologies: Git, MS Excel, MS Word, MS PowerPoint, MS Access
Core Concepts: Data Structures, Object-Oriented Programming, DBMS, Cybersecurity Fundamentals, Full-Stack Web Development

Projects

CGAN-Based Trace Augmentation for Side-Channel Attack on ML-KEM
Research Project — Python, PyTorch/TensorFlow, GAN, PQC Certificate Awarded; Under Review for Book Publication

- Designed a Conditional Generative Adversarial Network (CGAN)-based framework to generate realistic synthetic power traces for ML-KEM (CRYSTALS-Kyber).
- Addressed the challenge of limited and imbalanced side-channel datasets by augmenting trace data, reducing dependency on extensive physical trace collection.
- Improved machine learning-based profiling attack performance by training models on CGAN-augmented traces alongside real side-channel data.

Online Tutor Finder

Full-Stack Web Application — HTML, CSS, JavaScript, PHP, Python, RASA

- Built a full-stack platform to connect students and tutors with dedicated, role-based profiles for each user type.
- Implemented a tutor interview and verification system to ensure quality and trust on the platform.
- Developed location-based tutor search to help students find nearby tutors matching their requirements.
- Engineered secure user authentication using email-based OTP verification.
- Integrated a RASA-powered AI chatbot to assist users with queries and streamline tutor discovery.

Certifications

Certificate of Participation in International Conference on “Adapting to Change and Creating a Sustainable Future through Knowledge” — Bhairab Ganguly College
Tata Cybersecurity Security Analyst Job Simulation — Forage
Add-On Course: Way to AI using Python
Diploma in Information Technology Application (DITA)
Certificate in Information Technology Application (CITA)

Activities

Participant of Inter-College Poster Creation Competition
